

Accessories for use in connection with Alfix PlaneMix levelling mortars and self-levelling compounds

Alfix Barrier foam

Self-adhesive Polyethylene foam sticks with cover foil for sectioning of floors and for delimiting from neighboring rooms at door openings, drains, etc. when applying self-levelling compounds

Alfix barrier foam, 15 x 15 mm
Alfix barrier foam, 30 x 30 mm
Length: 0.95 m

Alfix Expansion list for walls

Self-adhesive polyethylene foam lists with cover foil for preventing levelling compound from adhering to walls when poured onto the floor.
For application if thickness exceeds 5 mm

Dimension: 5 x 50 mm (Alfix article no 8545)

Alfix Flow tester

For measuring the flow ability of the levelling compound according to EN Standard 12706
To ensure optimal workability and easy flow, it is crucial to establish correct water dosage. If too much water has been added to the compound, it could result in separation and formation of laitance on the final surface.

(Alfix article no. 8508)
Flow testing is performed on smooth surface, e.g., a synthetic plate 20 x 20 cm
(Alfix article no. 8509)

Levelling Peg

Plastic, Self-adhesive height measurement pins for use with self levelling compound.
Distribute levelling pegs evenly with a 1.0 – 1.5 m distance.
measuring height: Max 70 mm

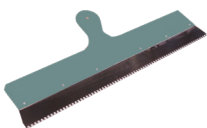

(Alfix article no 8540)

Alfix Polyethylene Mixing Buckets and Barrel

Volume:

- 20 litre bucket (Alfix article no 8522)
- 30 litre bucket (Alfix article no 8521)
- 75 litre barrel (Alfix article no 8520)

Alfix Trowel

For spreading Alfix PlaneMix levelling compounds.

Length: 600 mm, 6 x 6 mm notched trowel
(Alfix article no. 8114)

Alfix Spiked Roller with screen

Suitable for spreading, levelling and rolling out air bubbles when applying Alfix PlaneMix levelling compounds.

Fits telescopic shaft by adaptor

Width: 500 mm – Ø 31 mm (Alfix article no. 8513)
